

Open positions in
Ultracold Quantum Matter, Innsbruck, Austria
www.ultracold.at/grimm/

our new apparatus for
Dy quantum gas microscopy

*We are looking for ambitious postdocs and PhD students
to join our exciting research projects!*

- A postdoctoral (research associate) position is available at our Dy-K mixture experiment, with the goal to realize novel superfluid states in fermion mixtures. The candidate is expected to take a leading role in shaping the experiment and promoting its scientific goals. The position offers great opportunities for career-development in cold-atom science, including a long-term perspective of up to 6 years.

- A postdoctoral position is available at our Dy quantum-gas microscopy experiment (see picture above), with the goal to simulate lattice models of quantum magnetism.

- Two PhD student positions are available in our prestigious Doctoral Program "Atoms, Light, and Molecules". The candidates will spend half a year abroad as a part of their international training, see www.uibk.ac.at/dk-alm/
